Founded in 1862, Julius Meinl is one of the oldest coffee roasters in the world and an iconic Vienna coffee house brand. Our pioneering dedication to quality has been a family trademark for five generations and, with 160 years of experience, we are a preferred coffee supplier for Vienna's leading coffee houses where only the finest will do.

What makes our coffee so special?

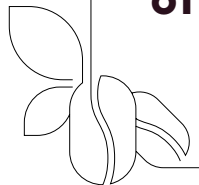

High quality coffee, own roasting method

Iconic viennese coffee recipes

Coffee traditions and innovative approach of 5 generations of Meinel family

It all started in 1862...

1862

Julius Meidl I. opens a spice shop in downtown Vienna, where he sells green coffee beans, cocoa, tea, spices, rice and sugar.

1877

Julius Meidl I. revolutionizes coffee roasting with a process he developed himself. The beans no longer came into contact with coal gases. For the first time, the coffee beans were free of aftertaste, while retaining their full natural aroma.

1913

Julius Meidl is the largest coffee roaster of the Austro-Hungarian Empire and at the same time the largest importer of coffee and tea in Central Europe, an economic area with 50 million inhabitants.

1924

The graphic designer Joseph Binder creates the Meidl logo, which becomes the iconic label for Meidl coffee and later the trademark of the company.

2002

International expansion: Julius Meidl becomes an active player in the global coffee market. Opening of the first Julius Meidl coffee shop in Chicago.

2004

Italian star designer Matteo Thun relaunches the Julius Meidl logo and develops a new, trendy cup design.

2008

During the 2008 European Football Championship, Julius Meidl builds the world's largest coffeehouse between the Natural History and Art History Museums on Vienna's Ringstrasse.

2012

Julius Meidl celebrates its 150 year anniversary of unrivalled quality and coffee expertise and the Julius Meidl Tea is relaunched under the term "East meets West".

2015

The „Pay with a poem“ event starts to be a big global success.

2023

For the fifth generation of the Meidl family, we have been roasting and blending the best coffee, independently selecting the best beans, observing manufacturing traditions and improving production technologies. The members of the family have made a major contribution to the coffee industry and the global coffee culture - and continue to do it today.

Viennese roasting

Julius Meinl II

The man who turned a small family business into one from the largest companies in Europe.

In 1877, he revolutionized coffee roasting: in his technological know-how grains ceased to be in contact with gas. For the first time, roasted coffee was free from off-flavours, and retained the natural flavor. It flipped ideas coffee lovers about what good coffee should be.

Today, the Viennese bean roast is considered a classic, and in Vienna there is a street named after Julius Meinl II - Julius Meinl Gasse.

To Go Cups

The coffee industry produces tons of coffee and coffee related waste.

As a contribution to waste reduction, we only use compostable coffee-to-go cups and lids out of bagasse and wooden stirrers. Bagasse is a natural by-product of sugar production that is produced when sugar cane is pressed. Our coffee cups are 100% bio-degradable and compostable.
